

FLEXIBLE SLURRY HOSE SYSTEM COMPOSIT

IS DESIGNED FOR ABRASIVE MATERIALS' HYDRO- / PNEUMO-HANDLING AT SUCTION AND PRESSURE LINES IN MINING AND CHEMICAL INDUSTRIES, POWER PLANTS, STEEL INDUSTRY, AND WHEREVER HIGH WEAR-RESISTANCE REQUIRED

DESCRIPTION

Flexible slurry hose system COMPOSIT consists of a slurry corrugated hose, a coupling, and a gasket.

INSTALLATION

Slurry hoses COMPOSIT can be easily cut to necessary length on site and joined with couplings.

ADVANTAGES

- increased durability
- enhanced wear-resistance
- economic & operational benefit
- annulling the high accuracy of pre-tracing of the line
- extra-flexibility
